

## SOURCE-BACKED JOBSITE REFERENCE

# Five numbers that sharpen a construction container decision.

Container size and capacity, field productivity, equipment-theft exposure and management opportunity. Each page states what the number can support and where its limits begin.

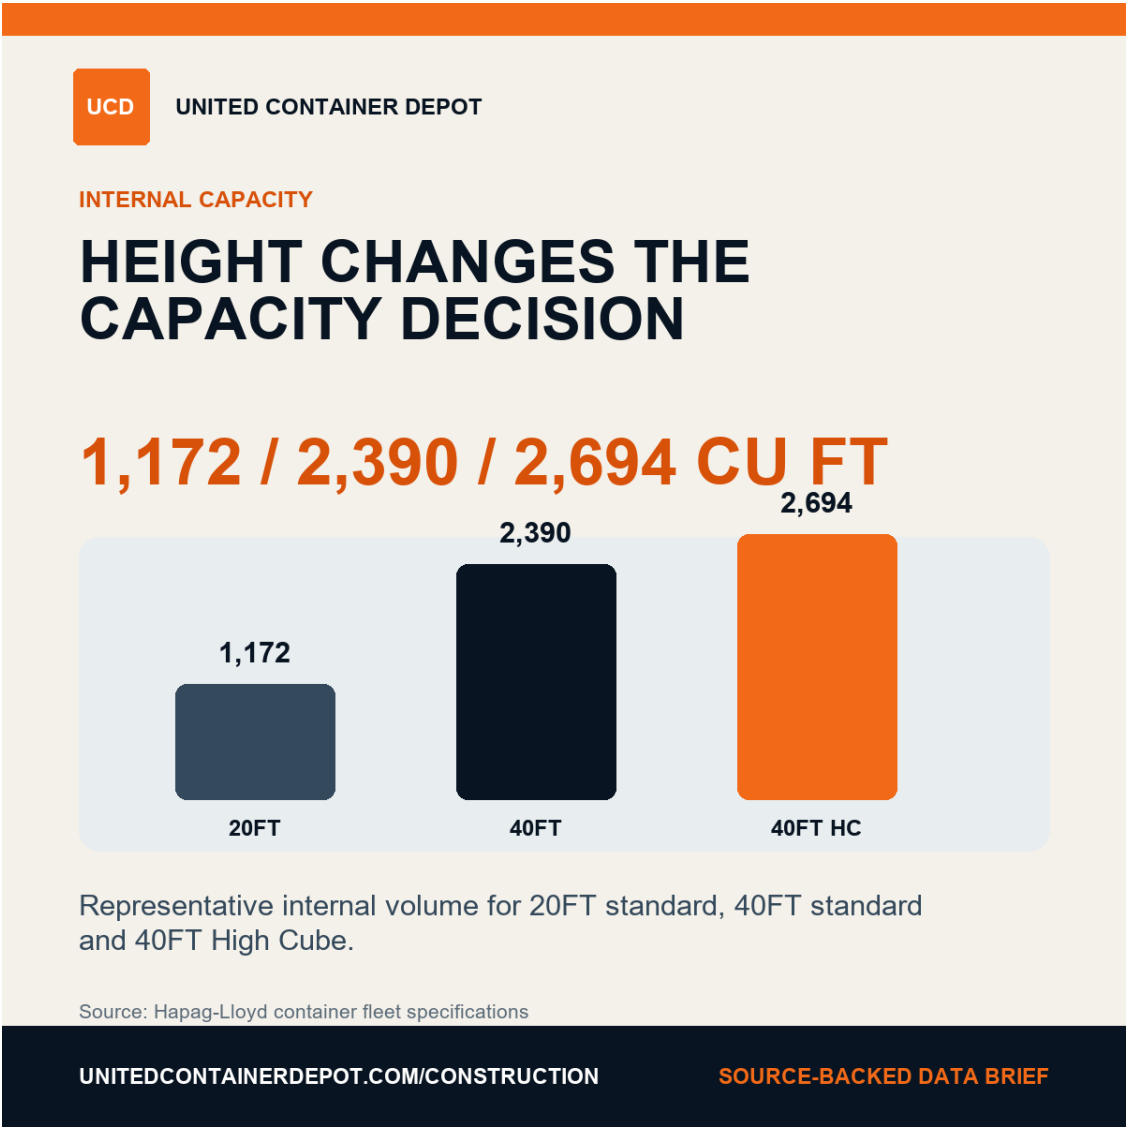

## USE IT

Share the charts, test the assumptions on the actual site, then confirm nearby inventory and delivery access before purchasing.

# 40FT Doubles The Nominal Footprint

# Height Changes The Capacity Decision

Representative internal volume for 20FT standard, 40FT standard and 40FT High Cube.
